

False Paranormal Theories

1. **Residual Haunting**: This is thought to be past traumatic events that imprints itself through audible/visual energy at a specific location over and over again. **These manifestations are absolutely real, and are actually open portals allowing demons to replay traumatic or horrific events that caused the initial portal.**
2. **Intelligent Haunting (classic ghost)**: They believe these are the spirits of deceased individuals that had lived in the home, and chose to stay close to their relatives, or never realized they died due to its suddenness and may need a Psychic Medium to have them "cross over." **These ghosts are just demons taking on the appearances of people from the past, to promote the lie that there may be a purgatory after death -- another way to heaven after death.**
3. **Poltergeist Haunting (noisy ghost)**: These hauntings bring many disturbances like noises, moving or throwing objects, manipulation of electronic devices, and physical attacks. **These demons sure like showing off their demonic powers. Their intention is to either put fear into their victims, or draw in those that are mesmerized by their powers or into the macabre.**
4. **Demonic Haunting**: They actually admit these are evil demons infesting homes and possessing people, causing much grief and harm to families. An exorcism or cleansing is done by clergy, mediums, spiritists, or shaman. **Many of whom perform cultic ceremonies or invoke gods' other than Jesus Christ to cast it out. The demons usually go along with these ruses and act like they left, but much later will reappear and start all over again.**

Note: Paranormal Investigators are experiencing real paranormal events, but tend to choose not to not debate the validity of their long held beliefs, and/or allow themselves to be led astray by the wrong spiritual voices in their community.

DBH understands Satan traps people by using his demons to copy certain supernatural tasks God occasionally uses his angels to accomplish in this earth.
